## Pressure Blasting Series

# 95PB

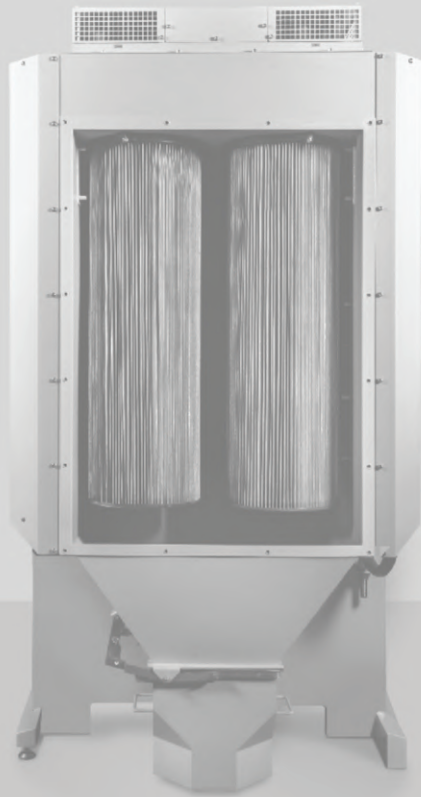

The new dry pressure blasting installation 95 PB equipped with the efficient pressure blasting system is specifically designed for efficient abrasion circulation. Suitable for heavy media abrasives

Pressure vessel

Spacious opening workplace

## FEATURES

- Pressure blasting technology
- Filter cartridge class "M" 10m<sup>2</sup>
- Media screening by cyclone system
- Filter cleaning 590W, through jet-pulse counter-current system
- Installation according to actual EC machinery directive

## DIMENSION CABIN

- Working cabin : 950 x 750 x 615 mm (W x D x H)
- Total machine dimension : 1010 x 1180 x 1845 mm (W x D x H)
- Door system : 1 front-opening door

## SPECIFICATION

- Nozzle : Hard metal range diameter are Ø 6mm (8-15mm)
- Actuator blasting system : Foot pedal actuator
- Container capacity : 8 liters pressure vessel
- Media abrasives : All usual blasting media can be used

## SUPPLY

- Air hose : Air supply inlet nipple 3/4" (19 mm)
- Pressure : Pressure range 0,5-6 bar
- Supply voltage : 230V 50/60 Hz
- Power consumption : 800W
- Compressed air consumption : Approx. 1000 lt/min with nozzle Ø 8 mm and blasting pressure 2 bar

## PURPOSE

- Surface cleaning
- Removing layer
- Remove coating/paint
- Contouring

## APPLICATION

- Machine building
- Mold & dies
- Heat treatment
- Maintenance
- Metal casting
- Oil, gas & construction
- For low to medium dust development

## OPTION FEATURES

- Rail cart loading-unloading station
- Turning table manually or automatic
- Security key switch
- Impact protection film
- Automatic turning basket
- Vibrator in chamber
